

AI skill audit: 60 second self assessment

Software & AI Consultant

TOOLS · 3 MIN READ · MAY 15, 2026

Most people learning AI are stuck because of order, not effort. Answer three questions and you'll know exactly where your gap is before you finish.

HOW IT WORKS

The audit walks you through three layers: what you're learning, what you've shipped, and the one gap between you and a working product.

Work through each layer honestly — your gap is what to focus on next.

THE THREE LAYERS

- 1 Layer 1 — Inputs: What are you actually learning right now? (Not what you want to learn — what you're consistently putting in.)
 - 2 Layer 2 — Outputs: What have you shipped with it? A project, automation, demo, or anything real you built or sent.
 - 3 Layer 3 — Gap: What is the one skill or knowledge piece between you and a working product? Name it specifically.
-

AFTER YOUR AUDIT

- Your gap is what to work on next — everything else is context
 - If outputs are blank, pick one tiny shippable project before adding more tutorials
 - Book a free call if you want help turning the gap into a concrete plan
