

AI tools ranked: bad, good, great for everything

Software & AI Consultant

TOOLS · 4 MIN READ · JUN 29, 2026

You are probably using the wrong AI tool for half the things on your list. Not because better options do not exist. Because no one put them in one place. Here is the full ranked list from the reel. Use it to audit your current stack and swap the one tool that will save you the most time this week.

HOW TO USE THIS LIST

Do not try to swap everything at once. One tool, one week.

- 1 Pick the one category where you lose the most time each week
- 2 Check which tier tool you are currently using
- 3 Sign up for the next tier this week, free trials exist for all of them
- 4 Run your next real project with the upgraded tool and compare the output
- 5 Repeat for the next category next week
