The 7 best AI website builders, ranked

TOOLS · 4 MIN READ · OCT 20, 2026

You saw the ranking. Here is the full list with each tier, who each builder is actually for and what it costs to start, so you can pick one today instead of testing all seven. Not sure where to start? Use the 2 minute picker at the bottom.

THE FULL RANKING

TIER	BUILDER	BEST FOR	PRICE TO START
S	Claude	Building a full site by just talking to it, with changes that actually stick	Free, Pro $20/mo
A	Framer	Premium landing pages you can fine tune down to every detail	Free, Basic about $10/mo per site (yearly)
A	v0	Clean, good looking designs right away	Free credits, paid from $20/mo
B	Lovable	Your very first website or app, zero experience	Free, Pro $25/mo
B	Google AI Studio	Building for free if you are OK with a rougher feel	Free
C	Bolt	Fast experiments and small projects	Free, Pro $25/mo
D	Wix AI	A quick site in a minute that you do not mind looking generic	Free with Wix ads, Light $17/mo (yearly)

STRENGTHS AND WATCH OUTS

BUILDER	WHERE IT SHINES	WATCH OUT FOR	GOOD FIRST PROMPT
Claude	Full sites, real code you own, follows detailed change requests	You still need somewhere to host it (Vercel or Netlify are free to start)	Build a one page site for my [business] with a hero, 3 services, reviews and a contact form
Framer	Pixel level control, animations, fast hosting built in	Paid plan per site once you add a custom domain	Make a premium landing page for [offer] in a dark, minimal style
v0	Polished UI and components in one shot	Credits go fast if you regenerate a lot	Design a modern homepage for [business], clean and lots of white space
Lovable	Easiest start, hosting and database included	Custom features get harder the bigger the project	Create a booking site for my [business] where clients pick a time
Google AI Studio	Free, strong models, quick prototypes	Feels technical, less hand holding	Build a simple landing page for [product] with an email signup
Bolt	Very fast to try ideas in the browser	Fixes can break earlier work on bigger projects	Make a small app that [does one thing]
Wix AI	A live site in minutes, everything in one place	Templates look alike, hard to make it feel custom	Use it only if you need something online today

PICK YOURS IN 2 MINUTES

Answer the first question that sounds like you and stop there.

1. Never built anything and want something live this week? Start with **Lovable**.
2. Design matters most to you? Start with **v0**.
3. Need a premium landing page you can tweak yourself? Go with **Framer**.
4. Want to spend nothing while you learn? Try **Google AI Studio**.
5. Want full control and a builder that follows your change requests? Use **Claude**. It is what I use for client sites.

BEFORE YOU PAY

Note: Prices were checked in October 2026 and these tools change them often. Check each pricing page before you upgrade, and stay on the free plan until you know you will keep using it.

Start with one builder, finish one real page with it, then decide. Switching tools every week is the slowest way to get a site live.
