

5 free resources to start learning AI

Software & AI Consultant

TOOLS · 4 MIN READ · JUL 10, 2026

You don't need a \$2,000 course or a computer science degree to start learning AI. These five free resources cover the fastest path in: an API to build with, a place to try any model, and two libraries of real working code.

WHAT'S INSIDE

This is the exact list from the reel: five free resources that get you building with AI instead of just reading about it. Each one is free to start with.

THE 5 RESOURCES

- ☐ [Google AI Studio](https://aistudio.google.com/): Free Gemini API access, build an AI app today
- ☐ [Hugging Face Spaces](https://huggingface.co/spaces): Try hundreds of AI models straight in your browser, no setup
- ☐ [Anthropic Cookbook](https://github.com/anthropics/anthropic-cookbook): Real code for building with Claude, copy and run
- ☐ [OpenAI Cookbook](https://cookbook.openai.com/): Same idea for GPT, hundreds of practical examples
- ☐ [Prompt Engineering Guide](https://www.promptingguide.ai/): Learn to write prompts that work on any model

HOW TO USE THIS LIST

Don't try to do all five at once.

- 1 Pick one resource and commit to it for a week before moving to the next
- 2 Start with Google AI Studio if you want to build something live today
- 3 Start with the Prompt Engineering Guide if you want better results from tools you already use
